Summary

I am a Frontend Web Developer with 4 years of experience, specializing in building responsive, interactive, and user-centric web applications using modern frameworks such as React.js and Next.js. Skilled in collaborating with cross-functional teams (UI/UX and backend) to deliver seamless, high-performance solutions. Proficient in implementing optimized state management, API integration, and performance improvements to enhance user experience. Passionate about continuous learning and applying the latest web technologies to create innovative and scalable solutions.

Education

IPB University Sep 2018 - Apr 2023

Bachelor's degree, Computer Science

Work Experiences

Frontend Developer at Unictive Media Oct 2025 - Present

Frontend Developer at Caliana Indonesia Mar 2025 - Sep 2025

- Responsible for developing the My Zetta Backoffice (ISP) system, using Next JS, React Bootstrap for UI consistency, and Redux for global state management.
- Collaborated with project manager and team members (UI/UX and backend) for feature implementation.
- Integrated RESTful APIs with React Query (TanStack Query) to reducing data loading times by optimizing fetch requests and implementing efficient caching mechanisms
- Building responsive and mobile-first web designs for a variety of devices, increasing user accessibility and engagement.
- Conducting unit testing, debugging, and performance optimization, successfully eliminating production bugs, thereby reducing downtime and user complaints.

Frontend Developer at Inkor Aug 2024 - Feb 2025

- Responsible for developing Chappy (LMS) platform from scratch using React JS and Tailwind CSS, delivering a scalable and maintainable frontend architecture.
- Collaborated with stakeholders and team members (UI/UX and backend) for feature implementation.
- Integrated RESTful APIs with React Query (TanStack Query) to optimize data fetching, caching, and synchronization, delivering smoother data flow and improved performance.
- Built responsive web designs for various devices.
- Conducted unit testing, debugging, and bug fixing.

Frontend Developer at Dealjava Apr 2023 - Jul 2024

- Responsible for developing a POS system from scratch using React JS and Chakra UI.
- Collaborated with the UI/UX team, Backend team, and Project Manager for feature implementation.
- Integrated multiple API including REST, GraphQL, and WebSocket, creating a highly interactive and real-time data experience that improved operational efficiency for end-users.
- Built responsive web designs for various devices.
- Transformed the application into a Progressive Web App (PWA), enabling offline functionality, and native-like installation, which increased user engagement and accessibility.
- Conducted unit testing and integration testing, identifying and resolving critical bugs, which enhanced application stability and reduced post-launch issues.

Frontend Developer Intern at DSITD IPB Feb 2022 - Mar 2023

- Responsible for developing several projects from scratch using PHP, Laravel, and .NET.
- Collaborated with the UI/UX and backend teams to implement features.
- Integrated APIs between frontend and backend (RESTful API).
- Built responsive web designs for various devices.
- Conducted unit testing, debugging, and bug fixing.

Skills

Frontend Technologies: HTML, CSS, JavaScript, Typescript, React JS, Next JS, React Query, Bootstrap, Tailwind CSS, Chakra UI, Zustand, Redux, Jest, React Testing Library (RTL).

Tools: VS Code, Version Control/Git, Jira, Postman, Swagger, Figma.

Languages: Indonesia (Native), English (Limited working proficiency).

Other: Responsive Web, RESTful APIs, WebSocket, GraphQL, Progressive Web Apps (PWA), Claude Agent AI.
